SKADELIK

WAARSKUWINGS

Hanteer versigtig.
Mag vel- en oogirritasie veroorsaak.
Mag skadelik wees indien ingesluk, ingeasem of deur vel geabsorbeer.
Giftig vir visse en wild.
Giftig vir bye.
Bêre in ‘n koel plek agter slot en grendel, weg van voedsel en voer.
Hou buite die bereik van kinders, oningeligte persone en diere.
In geval van vergiftiging ontbied ‘n geneesheer en toon hierdie etiket aan hom.

VOORSORGMAATREëLS

Vermy inaseming van sproeinewel en dampe
Vermy oog- en velkontak.
Dra beskermende klere en was dit na gebruik.
Was met seep en water na gebruik of toevallige velkontak.
Was besoedelde klere na gebruik.
Moenie eet, drink of rook tydens hantering of toediening en voordat werksklere uitgetrek en hande en gesig gewas is nie.
Maak toedieningsapparaat dadelik skoon na gebruik, en raak ontslae van uitspoelwater waar dit nie gewasse, of weiding, riviere of damme kan besoedel nie.
Voorkom besoedeling van voedsel, voer, eetgerei en drinkwater.
Vernietig die leë houer deur gate daarin te maak of plat te slaan en moet dit nooit vir ander doeleindes gebruik nie.
Hou kinders en troetediere weg van behandelde area tot Aphicide Plus droog is.

SIMPTOME VAN MENSLIKE VERGIFTIGING

Verlaagde spierfunksie, asemhalingsversteurings en bewing en spierkrampe in gevalle van ernstige vergiftiging.

NOODHULPBEHANDELING

Verwyder die persoon van die oorsaak van vergiftiging (na 'n koel, goed geventileerde omgewing).
Stel persoon gerus en hou hom stil.
Verwyder besoedelde klere en spoel besmette liggaamsdele met baie seep en koue water af.
Besmette oë moet vir 15 minute of langer met skoon water uitgespoel word.
Indien die middel ingesluk is, moenie braking induseer nie. Spoel mond met water uit en kontak dadelik ‘n geneesheer.

NOTA AAN GENEESHEER

Behandel simptomaties. Monitor respiratoriese en kardiese funksies. Maagspoeling, dan houtskool (carbo medicinalis) en natriumsulfaat.

GEBRUIKSAANWYSINGS **GEBRUIK SLEGS SOOS AANGEDUI**

MENGINSTRUKSIES

Voeg die benodigde hoeveelheid konsentraat by die water en roer deeglik. Moenie die spuitmengsel laat oorstaan voor dit gebruik word nie. Moenie brakwater gebruik nie.

GEWAS EN PLAAG	AANBEVOLE DOSIS	METODE EN TOEDIENING
Konifere: Italiaanse sipresluis *(Cinara cupressivora)*	**Bome korter as 2 m:** 20 mℓ/ ℓ water / boom **Bome tussen 2 en 2,5 m hoog:** 40 mℓ/2 ℓ water / boom **Bome tussen 2,5 en 3 m hoog:** 80 mℓ/4 ℓ water / boom **Bome hoër as 3 m:** 150 mℓ/8 ℓ water / boom	Behandelings kan voorkomend of korrektief toegedien word. Jaarlikse voorkomende behandeling word aanbeveel om te verhoed dat plante terugsterf a.g.v plantluisbesmetting. **Voorkomend:** Begin behandeling gedurende April tot Mei om plantluisbesmetting te voorkom. Dien toe as ‘n gronddeurwekingsbehandeling rondom die stambasis van elke boom. Herhaal na sowat twee maande. **Korrektief:** Dien toe as ‘n gronddeurwekings-behandeling rondom die stambasis van elke boom wanneer die eerste besmetting opgemerk word. Herhaal na sowat twee maande
Rose: Plantluise	20 mℓ/ ℓ water / roosboom	Dien toe as 'n gronddeurwekings-behandeling om die stamme van roosbome wanneer eerste tekens van plantluise opgemerk word. Herhaal na sowat twee maande.
Dopluise	10 mℓ/ ℓ water / roosboom	Dien toe as 'n gronddeurwekings-behandeling om die stamme van roosbome wanneer eerste tekens van dopluise opgemerk word. Herhaal na sowat twee maande.

<u>Laag-groeiende sierplante en grondbedekkers:</u> Plantluise en wolluise.	10mℓ/5 ℓ water / m^2	Gebruik ‘n gieter en dien 5 liter mengsel per m² toe as ‘n gronddeurwekings-behandeling.
<u>Sierstruike:</u> Plantluise, wolluise en dopluise.	**<u>Plante korter as 1 m:</u>** 10 mℓ / 500 mℓ water / plant **<u>Plante hoër as 1 m:</u>** 20 mℓ/ ℓ water / plant	Dien die mengsel om die stambasis toe as ‘n gronddeurwekingsbehandeling. Vir dopluise, moet die behandeling na sowat twee maande herhaal word.

HARMFUL

WARNINGS

Handle with care.
May cause skin and eye irritation.
May be harmful if swallowed, inhaled or absorbed through the skin.
Toxic to fish and wildlife.
Toxic to bees.
Store in a cool place under lock and key away from food and feed.
Keep out of reach of children, uninformed persons and animals.
In case of poisoning call a doctor and show him this label.

PRECAUTIONS

Avoid inhalation of spray mist / fumes.
Avoid eye and skin contact.
Wear protective clothing and wash this after use.
Wash with soap and water after use or accidental skin contact. Wash contaminated clothing after use.
Do not eat, drink or smoke whilst handling or applying the insecticide or before work clothes have been removed and hands and face washed.
Clean spray applicators immediately after use and dispose of rinse water where it cannot contaminate crops, grazing, rivers or dams.
Prevent contamination of food, feed, eating utensils and drinking water.
Destroy empty container and do not use for any other purpose.
Keep children and pets away from treated area until Aphicide Plus is dry.

SYMPTOMS OF HUMAN POISONING

Depressed muscular tone, respiratory disturbances and trembling and muscular cramps in severe cases of poisoning.

FIRST AID TREATMENT

Remove patient from source of poisoning (to a cool, well ventilated area).
Keep the person calm and reassured.
Remove contaminated clothing and rinse contaminated body area thoroughly with plenty of soap and cold water.
Contaminated eyes should be rinsed with clean water for 15 minutes or longer.
If ingested do not induce vomiting. Rinse mouth with water and contact a doctor immediately.

NOTE TO DOCTOR

Treat symptomatically. Monitor respiratory and cardiac functions. Gastric lavage, then charcoal (carbo medicinalis) and sodium sulphate.

DIRECTIONS FOR USE **USE ONLY AS DIRECTED**

MIXING INSTRUCTIONS

Add the required quantity of the concentrate to the water and stir thoroughly. Do not allow spray mixture to stand for any length of time before using. Do not use brackish water.

CROP AND PEST	RECOMMENDED DOSAGE	METHOD OF APPLICATION
Conifers: Italian cypress aphid *(Cinara cupressivora)*	**Trees less than 2 m tall:** 20mℓ/ ℓ water / tree **Trees between 2 and 2,5 m tall:** 40 mℓ/2 ℓ water / tree **Trees between 2,5 and 3 m tall:** 80 mℓ/4 ℓ water / tree **Trees taller than 3 m:** 150 mℓ/8 ℓ water / tree	Preventive- or corrective treatments can be applied. Yearly preventive treatments are recommended to avoid die-back of trees due to aphid infestations. **Preventive:** Start treatment during April to May to prevent aphid attacks. Apply as a drench around the stem base of each tree. Repeat after approximately two months. **Corrective:** Apply as a soil drench around the stem base of each tree when first signs of infestation are noticed. Repeat after approximately two months.
Roses: Aphids	20 mℓ/ ℓ water / rose bush	Apply as a soil drench around the stems of the rose bushes when first signs of aphids are noticed. Repeat application after approximately two months.
Scale insects	10 mℓ/ ℓ water / rose bush	Apply as a soil drench around the stems of the rose bushes when first signs of scale insects are noticed. Repeat application after approximately two months.
Low growing ornamental plants and ground covers		Use a watering can and apply 5 litre mixture per m² as a soil drench.

Aphids and Mealy bugs	10mℓ/5 ℓ water / m^2	

Ornamental shrubs: Aphids, Mealy bugs and Scale insects	**Shrubs less than 1 m tall:** 10 mℓ/500 mℓ water / plant **Shrubs taller than 1 m:** 20 mℓ/ ℓ water / plant	Apply the diluted mixture around the stem base as a soil drench. For Scale insects, repeat the application after approximately two months.
